Asthma Policy

Statement of intent

1. Legal framework
2. Roles and responsibilities
3. Asthma medicines
4. Emergency inhaler
5. Symptoms of an asthma attack
6. Response to an asthma attack
7. Emergency procedures
8. Record keeping
9. Exercise and physical activity
10. The school environment

Appendices

- A. Parental consent form
- B. Letter to inform parents of inhaler use
- C. Recognising an asthma attack
- D. What to do in the event of an asthma attack

Statement of intent

Stoke Prior First School recognises that asthma is a serious but controllable condition and welcomes all pupils with asthma. This policy sets out how the school ensures that pupils with asthma can participate fully in all aspects of school life including physical exercise, school trips and other out-of-school activities. It also covers how the school enables pupils with asthma to manage their condition effectively in school, including ensuring immediate access to reliever inhalers where necessary.

1. Legal framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- Equality Act 2010
- DfE (2015) 'Supporting pupils at school with medical conditions'
- Asthma UK (2020) 'Asthma at school and nursery'
- DfE (2022) 'First aid in schools, early years and further education'
- DfE (2015) 'Guidance on use of emergency salbutamol inhalers'

This policy operates in conjunction with the following school policies:

- Complaints Policy
- Supporting Pupils with Medical Conditions Policy
- First Aid Policy

2. Roles and responsibilities

The governing body has a responsibility to:

- Ensure the health and safety of staff and pupils is protected on the school premises and when taking part in school activities.
- Ensure that this policy, as written, does not discriminate against any of the protected characteristics, in line with the Equality Act 2010.
- Handle complaints regarding this policy as outlined in the school's Complaints Policy.
- Ensure this policy is effectively monitored and updated.
- Report any successes and failures of this policy to the headteacher, members of school staff, local health authorities, parents and pupils.
- Provide indemnity for teachers and other members of school staff who volunteer to administer medicine to pupils with asthma in need of help.

The headteacher has a responsibility to:

- Create and implement this policy with the help of school staff, school nurses, local guidance and the governing board.
- Ensure this policy is effectively implemented and communicated to all members of the school community.
- Arrange for all members of staff to receive training on supporting pupils with asthma. Ensure all supply teachers and new members of staff are made aware of this policy and provided with appropriate training.
- Monitor the effectiveness of this policy.
- Ensure that first aiders are appropriately trained regarding asthma, e.g. supporting pupils to take their own medication and caring for pupils who are having asthma attacks.
- Delegate the responsibility to check the expiry date of spare reliever inhalers and maintain the school's asthma register to a designated member of staff.

All school staff have a responsibility to:

- Read and understand this policy.
- Know which pupils they come into contact with, who have asthma.
- Know what to do in the event of an asthma attack.
- Allow pupils with asthma immediate access to their reliever inhaler.
- Inform parents if their child has had an asthma attack.
- Inform parents if their child is using their reliever inhaler more than usual.
- Ensure pupils with asthma have their medication with them on school trips and during activities outside of the classroom.
- Be aware that pupils with asthma may experience tiredness during the school day due to their night-time symptoms.

Pupils with asthma have a responsibility to:

- Tell their teacher or parent if they are feeling unwell due to their asthma.
- Treat the school's and their own asthma medicines with respect by not misusing the medicines and/or inhalers/spacers.
- Know how to gain access to their medication in an emergency.
- Know how to take their asthma medicine, if they are able to.

Parents have a responsibility to:

- Inform the school if their child has asthma.
- Ensure the school has a complete, signed and up-to-date care plan for their child. (Advising us of any changes as soon as possible, written and signed).
- Inform the school of the medication their child requires during school hours and dosage.
- Inform the school of any medication their child requires during school trips, team sports events and other out-of-school activities.
- Inform the school of any changes to their child's medicinal requirements.
- Inform the school of any changes to their child's asthmatic condition, e.g. if their child is currently experiencing sleep problems due to their condition.
- Ensure their child's reliever inhaler (and spacer where relevant) is labelled with their child's name.
- Ensure that their child's reliever inhaler is within their expiry dates.
- Ensure their child has regular asthma reviews with their doctors or asthma nurse (recommended every 6-12 months).

3. Asthma medicines

Pupils with asthma will have their inhalers given to the school to be looked after. kept in the school's charge are held in the pupil's classroom.

Parents will be required to label their child's inhaler with the child's full name and year group.

Members of staff are not required to administer medicines to pupils, except in emergencies. Staff members who have volunteered to administer asthma medicines will be insured by the school's appropriate level of insurance which includes liability cover relating to the administration of medication.

Staff will administer the asthma medicines in line with the school's Administering Medication Policy. For pupils who are old enough and/or have sufficient capabilities and independence to do so, staff members' roles in administering asthma medication will be limited to supporting pupils to take the medication on their own.

This policy is predominantly for the use of reliever inhalers. The use of preventer inhalers is very rarely required at school. In the instance of a preventer inhaler being necessary, staff members may need to remind pupils to bring them in or remind the pupil to take the inhaler before coming to school.

4. Emergency inhaler

The school keeps a supply of salbutamol inhalers for use in emergencies when a pupil's own inhaler is not available. These are kept in the school's emergency asthma kits.

Emergency asthma kits contain the following:

- A salbutamol metered dose inhaler
- Two plastic, compatible spacers
- Instructions on using the inhaler and spacer
- Instructions on cleaning and storing the inhaler
- Instructions for replacing inhalers and spacers
- The manufacturer's information
- A checklist, identifying inhalers by their batch number and expiry date
- A list of pupils with parental consent and/or individual healthcare plans permitting them to use the emergency inhaler
- A record of administration showing when the inhaler has been used

The emergency inhaler should only be used by pupils, for whom written parental consent has been received and who have been either diagnosed with asthma or prescribed an inhaler as reliever medication. Parental consent for the use of an emergency inhaler should form part of the pupil's asthma care plan.

When not in use, emergency inhalers are stored in the central first aid cupboard and in the temperate conditions specified in the manufacturer's instructions, out of reach and sight of pupils, but not locked away.

Spacers must not be reused in school, but may be given to the pupil for future home-use. Emergency inhalers may be reused, provided that they have been properly cleaned after use.

In line with the school's Supporting Pupils with Medical Conditions Policy and First Aid Policy, appropriate support and training will be provided for relevant staff, e.g. first aid staff, on the use of the emergency inhaler and administering the emergency inhaler.

Whenever the emergency inhaler is used, the incident must be recorded in the corresponding record of administration and the school's records. The records will indicate where the attack took place, how much medication was given, and by whom. The pupil's parents will be informed of the incident in writing (Appendix B).

A designated staff member is responsible for overseeing the protocol for the use of the emergency inhaler, monitoring its implementation, and maintaining an asthma register.

The designated staff member who oversees the supply of salbutamol inhalers is responsible for:

- Checking that inhalers and spacers are present and in working order, with a sufficient number of doses, on a monthly basis.
- Ensuring replacement inhalers are obtained when expiry dates are approaching.
- Ensuring replacement spacers are available following use.
- Ensuring that plastic inhaler housing has been cleaned, dried and returned to storage following use, and that replacements are available where necessary.

5. Symptoms of an asthma attack

Members of staff will look for the following symptoms of asthma attacks in pupils:

- Persistent coughing (when at rest)
- Shortness of breath (breathing fast and with effort)
- Wheezing
- Nasal flaring
- Complaints of tightness in the chest
- Being unusually quiet
- Difficulty speaking in full sentences

Younger pupils may express feeling tightness in the chest as a 'tummy ache'.

6. Response to an asthma attack

In the event of an asthma attack, staff will follow the procedure outlined below:

- Keep calm and encourage pupils to do the same.
- Encourage the pupil to sit up and slightly forwards – do not hug them or lie them down.
- If necessary, call another member of staff to retrieve the child's own inhaler or the emergency inhaler – do not leave the affected pupil unattended.
- If necessary, summon the assistance of a member of suitably trained first aid staff to care for the pupil and help administer an emergency inhaler.
- Ensure the pupil takes two puffs of their reliever inhaler (or the emergency inhaler) immediately, preferably through a spacer.
- Ensure tight clothing is loosened.
- Reassure the pupil.

Staff will not administer any medication where they have not been trained to do so.

If there is no immediate improvement, staff will continue to ensure the pupil takes 2 puffs of their reliever inhaler every two minutes, until their systems improve, but only up to a **maximum of 10 puffs**. If there is no improvement before the pupil has reached 10 puffs:

- Call 999 for an ambulance.
- If an ambulance does not arrive within 10 minutes, the pupil can administer another 10 puffs of the reliever inhaler as outlined above.

Staff will call 999 immediately if:

- The pupil is too breathless or exhausted to talk.
- The pupil is going blue.
- The pupil's lips have a blue or white tinge.
- The pupil has collapsed.
- You are in any doubt.

7. Emergency procedures

Staff will never leave a pupil having an asthma attack unattended. If the pupil does not have their inhaler to hand, staff will send another member of staff or pupil to retrieve their spare inhaler. In an emergency situation, members of school staff are required to act like a 'prudent parent', i.e. making careful and sensible parental decisions intended to maintain the child's health, safety and best interests.

As reliever medicine is very safe, staff will be made aware that the risk of pupils overdosing on reliever medicine is minor. Staff will send another pupil to get another member of staff if an ambulance needs to be called. The pupil's parent will be contacted immediately after calling an ambulance.

A member of staff should always accompany a pupil who is taken to hospital by ambulance and stay with them until their parent arrives. Generally, staff will not take pupils to hospital in their own car unless in exceptional circumstances, e.g. where a pupil is in need of professional medical attention and an ambulance cannot be procured.

In these exceptional circumstances, the following procedure will be followed in line with the First Aid Policy:

- A staff member will call the pupil's parents as soon as is reasonably practical to inform them of what has happened, and the course of action being followed – parental consent is not required to acquire medical attention in the best interests of the child.
- The staff member will be accompanied by one other staff member, preferably a staff member with first aid training.
- Both staff members will remain at the hospital with the pupil until their parent arrives.

8. Record keeping

At the beginning of each school year, or when a child joins the school, parents are asked to inform the school if their child has any medical conditions, including asthma, on their enrolment form.

The school keeps a record of all pupils with asthma, complete with medication requirements, in its asthma register. Parents will be required to inform the school of any changes to their child's condition or medication during the school year.

All emergency situations will be recorded, and staff practice evaluated, in line with the First Aid Policy.

9. Exercise and physical activity

Games, activities and sports are an essential part of school life for pupils. All teachers will know which pupils in their class have asthma and will be aware of any safety requirements.

Outside suppliers of sports clubs and activities are provided with information about pupils with asthma taking part in the activity via the school's club registers.

Pupils with asthma are encouraged to participate fully in PE lessons when they are able to do so. Pupils whose asthma is triggered by exercise will be allowed ample time to thoroughly warm up and cool down before and after the session.

The school believes sport to be of great importance and utilises out-of-hours sports clubs to benefit pupils and increase the number of pupils involved in sport and exercise. Pupils with asthma are encouraged to become involved in out-of-hours sport as much as possible and will never be excluded from participation. Members of school staff and contracted suppliers will be aware of the needs of pupils with asthma during these activities and what to do in the event of a pupil having an asthma attack.

10. The school environment

The school does all that it can to ensure the school environment is favourable to pupils with asthma.

As far as possible, the school does not use any chemicals in art or science lessons that are potential triggers for asthma. If chemicals that are known to be asthmatic triggers are to be used, asthmatic pupils will be taken outside of the classroom and provided with support and resources to continue learning.

Appendix A

CONSENT FORM:

USE OF EMERGENCY SALBUTAMOL INHALER

Stoke Prior First School

Child showing symptoms of asthma / having asthma attack

1. I can confirm that my child has been diagnosed with asthma / has been prescribed an inhaler
2. My child has a working, in-date inhaler, clearly labelled with their name, which they will have in school every day.
3. In the event of my child displaying symptoms of asthma, and if their inhaler is not available or is unusable, I consent for my child to receive salbutamol from an emergency inhaler held by the school for such emergencies.
4. I will advise the school at the start of the day if my child has used their inhaler, prior to attending school or wrap around care.

Signed:Date:

Name
(print).....

Child's name

Appendix B

LETTER TO INFORM PARENTS OF EMERGENCY SALBUTAMOL INHALER USE

Child's name:

Class:

Date:

Dear.....,

This letter is to formally notify you that.....has had problems with his / her breathing today. This happened when.....

.....

(Delete as appropriate)

A member of staff helped them to use their asthma inhaler.

They were given puffs.

They did not have their own asthma inhaler or it was not working, so a member of staff helped them to use the emergency asthma inhaler containing salbutamol. They were given puffs.

Appendix 3

HOW TO RECOGNISE AN ASTHMA ATTACK

The signs of an asthma attack are

- Persistent cough (when at rest)
- A wheezing sound coming from the chest (when at rest)
- Difficulty breathing (the child could be breathing fast and with effort, using all accessory muscles in the upper body)
- Nasal flaring
- Unable to talk or complete sentences. Some children will go very quiet.
- May try to tell you that their chest 'feels tight' (younger children may express this as tummy ache)

CALL AN AMBULANCE IMMEDIATELY AND COMMENCE THE ASTHMA ATTACK PROCEDURE WITHOUT DELAY IF THE CHILD

- Appears exhausted
- Has a blue/white tinge around lips
- Is going blue
- Has collapsed

Appendix D

WHAT TO DO IN THE EVENT OF AN ASTHMA ATTACK

- Keep calm and reassure the child
- Encourage the child to sit up and slightly forward
- Use the child's own inhaler – if not available, use the emergency inhaler
- Remain with the child while the inhaler and spacer are brought to them
- Immediately help the child to take two separate puffs of salbutamol via the spacer
- If there is no immediate improvement, continue to give two puffs at a time every two minutes, up to a maximum of 10 puffs
- Stay calm and reassure the child. Stay with the child until they feel better. The child can return to school activities when they feel better
- If the child does not feel better or you are worried at ANYTIME before you have reached 10 puffs, CALL 999 FOR AN AMBULANCE
- If an ambulance does not arrive in 10 minutes give another 10 puffs in the same way
